DESIGN SERVICES

By combining our CAD (Computer Aided Design) capabilities with our extensive knowledge and experience of the office furniture and interiors sector we are able to offer independent and impartial help with the design and planning of your new or existing meeting area or boardroom.

Following our initial consultation to define your objectives, we will carry out a survey to take the initial dimensions, note positions of windows, radiators, doors and columns together with any other elements we believe might be crucial in maximising the use of your floor-space.

We have four stages for designing your office space that consist of Consultation, 2D & 3D Layouts, Fully Rendered Visuals and Animated walk-through to help determine your needs.

2D & 3D LAYOUTS

Following any amendments that may be required, we can then undertake to produce a 3D view showing a number of different perspective.

This allows you to visualise your new boardroom space from any angle and helps to overcome many of the objections that can occur when planning a major refit or relocation.

Subject to approval of the previous stages, we can then assist by producing fully rendered 3D views of your workspace.

Now we can start adding colours to the boardroom furniture products as well as wall and flooring finishes to allow you to view your finished office, this process allows you to make changes at the planning stage prior to the start of a project and has proved beneficial to many clients.

RENDERED VISUALS

SQUARE

Whatever the dimensions of your boardroom space, or the size of your budget, we can provide bespoke boardroom solutions where it matters the most.

Our boardroom tables can be made from a wide array of materials including functional MFC or Laminate, sleek Glass and Veneer, eye-catching Corian, minimalist Concrete, beautiful Quartz Composite and even breathtaking Natural Stone.

ROUND

Aesthetics play a major part in the success of your boardroom. Multi-national corporations use their meetings spaces as the focal point for the design flair of their brand.

As a space that commands respect, your boardroom must offer the ability to transition quickly from a meeting room to a training room at just a moment's notice..

We can be commissioned to design and manufacture any size and shape of table to work within the confines of your boardroom space.

We work with a wide range of solid surfaces that can incorporate additional design features. Using only the most aesthetically pleasing, durable table tops, placed perfectly on legs or frames that can be fully mobile, our boardroom tables are built to last.

OVAL

RECTANGULAR

From cutting edge to contemporary, we can create bespoke boardroom tables that are all crafted with consideration and care.

From unique pieces that exude one-of-a-kind allure, to a focal piece that perfectly matches your existing decor, our tailor made boardroom tables will complete the look and feel of your boardroom.

D-END

Because every square inch of your boardroom is as important as the next, we pay attention to the smallest of details to ensure that the space works on every level.

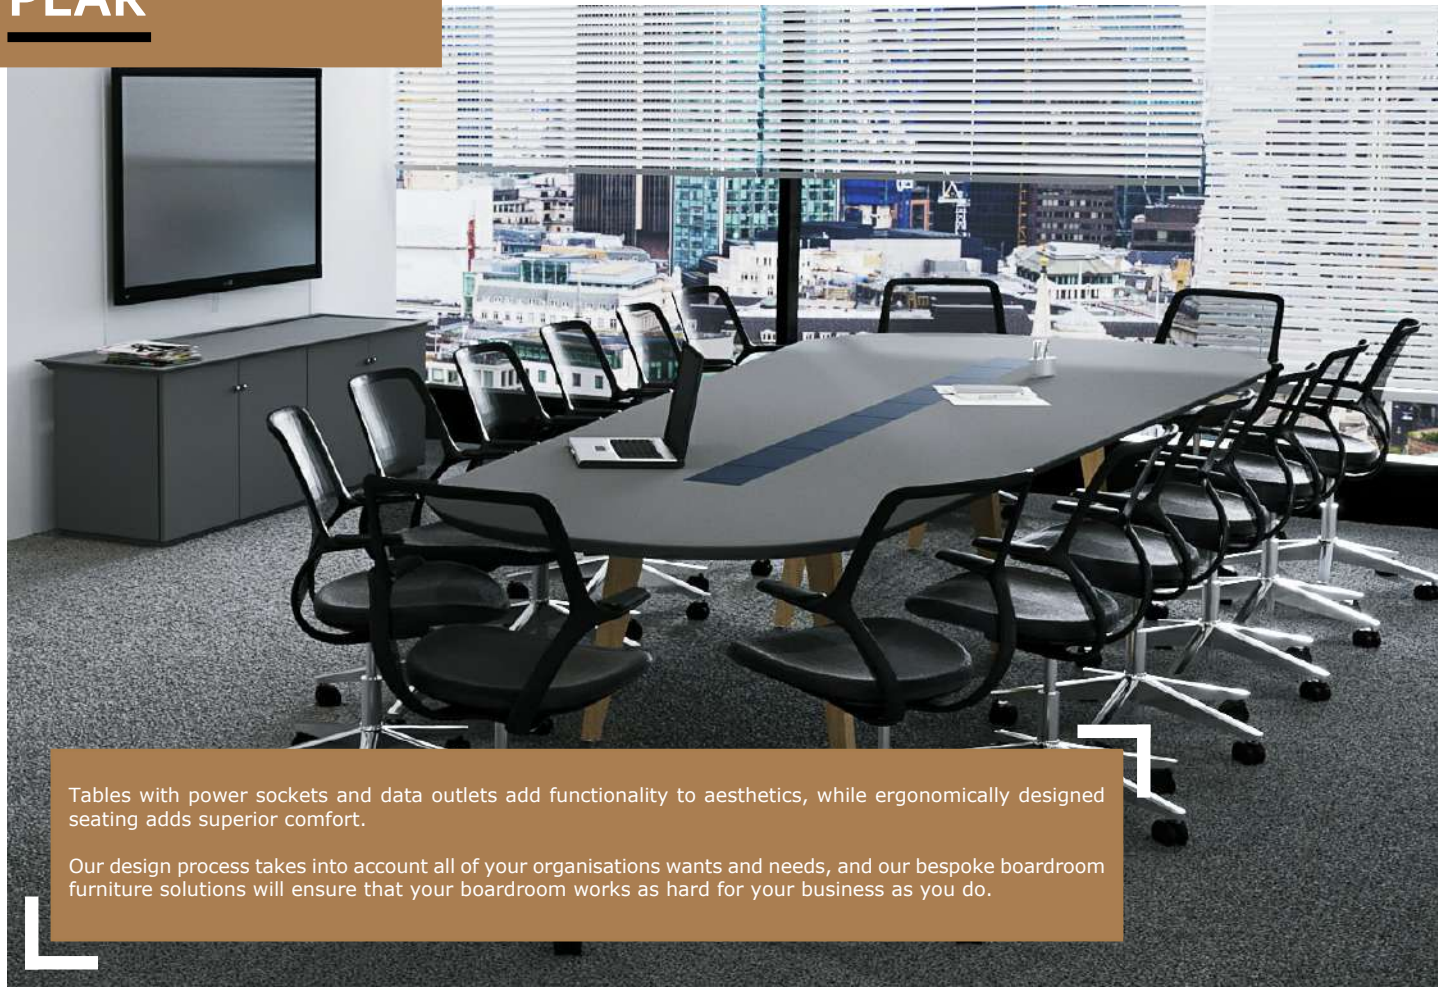
From the design of your table to the positioning of your chairs, the aspects that matter to you most become our biggest inspiration.

Your boardroom is the beating heart of your business. It is where deals are made, where innovative ideas are born and where your employees learn the story of your business.

The furniture you choose to use in your boardroom should be designed to make a statement about who you are as a company, and to reflect your values and corporate identity.

BOAT/BARREL

PEAR



Tables with power sockets and data outlets add functionality to aesthetics, while ergonomically designed seating adds superior comfort.

Our design process takes into account all of your organisations wants and needs, and our bespoke boardroom furniture solutions will ensure that your boardroom works as hard for your business as you do.

TABLE SHAPES & DIMENSIONS

Square

Shape	Table Ref	Dimensions	Number of People
